

**Fire Protection System Device
Installers or Testers
1/14/2011**

The following contractors have indicated that they are interested in assisting Marion Utility customers with their backflow prevention device responsibilities. This list is provided for information only and constitutes no recommendations. A contractor on this list or another contractor of your choice can install your backflow prevention device. Your backflow prevention device must be tested by an inspector certified by the State of Indiana. You may choose a tester on this list or another tester of your choice. The person who installs your device may also be a certified tester, but does not have to be. The cost for installation and testing varies.
