RP EXEMPTION APPLICATION

Please complete the following application for exemption from the installation of an RP device on your main water service line. To be considered for an exemption, the application must document that each fixture or piece of equipment using water terminates in an air gap or is fitted with an approved backflow prevention device. Any change in water using fixtures or equipment will void an approved RP exemption. If you need assistance to complete this form, please contact Pam Kirklin at 765-664-2391 ext. 128.

Business Name: _____
Service Address:_____
Contact: _____ Phone: _____

Is this application for? (circle one) an alternate device or no device
What alternate device is requested? _____

What does your facility produce or do? _____
When did you begin activities at this location? _____
