

# HAULED WASTE RATES

## Septic Trucks

Septic Tank Waste

**\$110 / load**

Trucks with < 2,500 gallon capacity\*

**Additional \$60 / 1,000 gallons**

Trucks with > 2,500 gallon capacity\*

**\*Rate charged is based on tank capacity, not actual volume discharged**

## Restaurant / Food Service

Grease Trap Waste

**\$0.09 per gallon capacity\***

## PERMIT REQUIREMENTS

Waste haulers planning to discharge septic tank waste or waste from food service grease traps must obtain a permit from Marion Utilities. A separate permit is issued for septic tank waste and food service grease trap waste. If a waste hauler plans to discharge waste from both sources, two permits are required. Contact Marion Utilities for a permit application.

## DISCHARGE PROCEDURES

Waste haulers permitted to discharge septic tank waste shall discharge waste at the receiving station adjacent to Building 101 at the Wastewater Treatment Plant between the hours of 7:00 am and 3:00 pm. Waste haulers permitted to discharge food service grease trap waste shall discharge waste at the FOG receiving pit adjacent to Building 102. Food service grease trap waste must be approved and scheduled prior to discharging. Samples must be collected and submitted before discharging and the receiving area must be cleaned by the hauler after discharging.

*For more information or to schedule a grease trap load, please contact Pam Kirklin at 765-664-2391 ext. 134.*
