2025 Rules & Regulations Update

PRESS RELEASE Contact Sherry Loshnowsky @ 765.664.2391 ext. 117 or email sloshnowsky@marionutilities.com

February 10, 2025 - With President Trump back in office, there have been a number of executive orders and policy changes with varying levels of impact. Keeping track of all the legal and political jargon can be daunting and confusing. As such, Marion Utilities wants to help you understand what these things mean for you specifically regarding water quality regulations. When updates are available, we will make every attempt to keep you informed.

Most recently, there has been a lot of attention given to the removal of lead service lines and how to deal with PFAS. Marion Utilities is actively pursuing all monitoring protocols for both, and we can tell you with confidence that your drinking water is safe! Our staff has always been and will continue to be diligent in making sure that never changes. Our process control procedures are designed to keep us operating within safe parameters at all times. Regardless of how regulations from the Environmental Protection Agency (EPA) and/or the Indiana Department of Environmental Management (IDEM) may change under the current administration, your water quality will remain protected. The 2024 Water Quality reports can be found at www.marionutilities.com and will be mailed with an upcoming bill.
